"Whoop de god damn de doo!!! It's hard to believe that when we started making our little movie 36 years ago, we would be here today working on a video game based on it. It's been an incredible journey that fulfilled a lifelong dream of the brothers making a movie. The love and support we've received from the fans was unexpected. We cherish both experiences. We just wanted to make a movie we would like to go and see. It warms us that others have embraced it to this day. Making a movie is a near-impossible task. It takes a small army of people, and we were fortunate to work with some of the best friends who graciously shared their talent to help make our silly idea a reality, and others who were captivated by its craziness and remained dedicated to the production through difficult times. To all involved, we can't thank you enough. We are forever grateful for your efforts.There's that old saying, "Good things come to those who wait." It applies to us and the fans who have supported the movie all these years.
We are so excited to be a part of this video game. Many new, creative friends have brought this latest endeavor to life.
Finally, we can enter the world and minds of the Klowns as they launch another invasion or foolishly attempt to battle them as humans.

The teams at IllFonic and Teravision have gone above and beyond in expanding the Klown lore and creating an insanely entertaining game. We can't wait to play head-to-head with and against all the Klown fans. "Killer Klowns from Outer Space! Holy S#@t!!!".
